

SONOpan® panels are an efficient acoustical insulation offering a soundproofing board that is adaptable to all types of construction.

In the reduction of airborne noise, SONOpan® panels offer unsurpassed performance at a reasonable price.

Benefits

SONOpan® is manufactured with 100% recycled and recyclable material;

SONOpan® is manufactured with non-toxic contents (without COV and Ure-formaldehyde);

SONOpan® offers a continuous acoustic sound barrier;

SONOpan® is lightweight, easy to cut and install;

SONOpan® is ideal for home theater and studio rooms insulation, existing walls and other noisy rooms;

Fire-retardant version available SONOsecur®;

SONOpan® favour the getting of credits as part of program LEED® and Green Building.

Superior Soundproofing Panels

Wall assembly - ITS56

Wood or metal studs (2" x 4") (fixed at 24" o.c.)

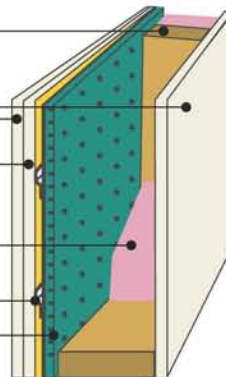

5/8" Type X gypsum board (screwed at 12" o.c.)

5/8" Type X gypsum board (screwed at 12" o.c. along the edges and 24" o.c. in the field)

3 1/2" R-12 glass fiber insulation (wool batts)

1/2" resilient channels (16" o.c.)

SONOpan® acoustic panel (screwed 24" o.c.)

Assemblage mural - FITS 53 - FIIC61

2" x 10" wood beams (screwed at 16" o.c.) Bridging between joists at midspan

Carpet and underpad

5/8" Aspenite, OSB

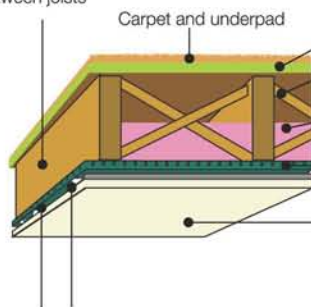

Bridging between joists at midspan

R-12, 3 1/2" acoustical Insulation wool

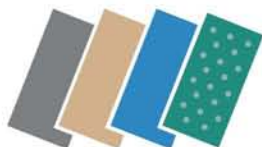

3/4" SONOpan® acoustical panel

5/8" gypsum board, parallel to beams (screwed to the resilient channels)

1/2" resilient metal channels (screwed at 12" o.c.)

Excellent acoustic and thermal properties
